Liceo Scientifico

High School Diploma from Stanford High School of Brescia (2023).

Bachelor Degree in Management and Data Science

Currently attending H-Farm College, in collaboration with Chichester University. Expected graduation in 2026.

WORKING EXPERIENCES

Restourant (2021-2022)

I worked at a local pizzeria, where I efficiently organized the pizza preparation line and proactively managed the electric ovens to optimize workflow based on the volume of orders each evening. My ability to anticipate demand and ensure timely preparation contributed to smooth operations during peak hours. Additionally, I took responsibility for coordinating home deliveries, ensuring customer satisfaction through prompt and accurate service.

Heating Systems Company (2022-2023)

I worked for 6 months as an apprentice at a company specialized in the installation of air conditioners, boilers, and other electrical systems directly at customers' homes. My role involved actively supporting the technical team, ensuring efficient and high-quality installations in a timely manner. I developed skills in handling technical tools and coordinating operational activities, contributing to the success of each project.

Fish Large-Scale Distribution Company (2024)

I completed an internship at a company specialized in the large-scale distribution of fish across Italy, where I was responsible for organizing invoices and managing simple administrative tasks. I also took a proactive role in the warehouse, where I prepared orders for dispatch, ensuring timely and accurate loading of trucks. This experience helped me develop strong organizational and multitasking skills.
